

## SFOT with Invisalign Timeline

**Step 1:** Invisalign Consultation with General Dentist/Orthodontist

- Gather all records, including iOS and CBCT
  - If you don't have CBCT, DDS will take this and upload

**Step 2:** Periodontal Consultation with DDS

**Step 3:** General Dentist/Orthodontist and Periodontist review ClinCheck and discuss tooth movements

**Step 4:** Patient receives attachments and the first set of Invisalign trays

**Step 5:** SFOT Surgery is scheduled 1-2 weeks after attachments and delivery of the first set of trays (step 4)

**Step 6:** SFOT Surgery

**Step 7:** Follow-ups with DDS (1 week and 2 week post-ops)

- Suture removal may happen at week 1 or week 2, depending on soft tissue healing
- During this time, DDS will instruct the patient when to change trays and how often

**Step 8:** Follow up with DDS as needed for soft tissue healing

**Step 9:** Follow up with General Dentist/Orthodontist as needed

- Recommend a progress scan at tray #12
